

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No.: 10/678,375

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of the Disclosure.

Please add the following new Abstract of the Disclosure:

Modularized circuit design generating tool comprises: a circuit module design database storing circuit design information of functional modules of at least two categories, at least one category includes design information of circuit modules of at least two different specifications; an element selection part to select suited circuit modules from the circuit module design database according to particular specifications of functional elements to be included into the circuit and to include circuit design information corresponding to the selected circuit modules into circuit design information file of the circuit; a circuit module connection part to define connections between or among selected circuit modules according to features of each selected circuit module; a memory to store circuit design information of all selected circuit modules and information of connections between and/or among the selected circuit modules; and a file converting part to convert circuit design information so obtained into an applicable format.
